

Transform Legacy BW into Scalable, AI-Ready Infrastructure

Modernization Drivers

Three Modernization Paths. One Strategic Goal

Why Us?

Deep expertise in modern data stack including SAP and hyperscaler platforms

Customer success stories spanning across industries

Purpose built migration accelerators for faster time to value

Modernization strategies tailored to your industry and business goals

AI-ready data architectures that unlock smarter, future-proof analytics

End-to-end partnership from roadmap design to post-migration success

Strong Partner Ecosystem

QuickStart with our Free 3-Step BW Modernization Assessment

Our expert-led, three-phase assessment delivers a complete diagnostic of your current BW environment and a clear path forward

In-depth system analysis

1

Objectives:

Comprehensive BW System Review

Architecture diagrams with satellite integrations and detailed landscape questionnaire

Production Environment Analysis

Early Watch Report diagnostics with performance benchmarks and system metrics

Migration Capacity Planning

Sizing reports for BW Bridge/Datasphere transition and annual data growth patterns

Object Utilization Audit

Full inventory analysis with usage statistics and functional area mapping

Strategic Discovery Sessions

2

Objectives:

- Walkthrough existing data models and current architecture.
- Identify source systems (ECC, S/4, SQL, etc.).
- Review security/governance and ABAP customizations.
- Discuss data requirements, current challenges, and future reporting vision.

Tailored Roadmap

3

Deliverables:

- Present the analytics landscape and transition roadmap.
- Provide strategic recommendations for architecture (e.g., BW PCE, Greenfield Datasphere, Hyperscalers).
- Share a high-level plan, resource estimate, and effort required.

Customer Success

Oil and Gas

Modernized existing legacy BW systems- BW on HANA, BW/4HANA and Implemented Business Data Fabric With SAP Datasphere, AWS & SAC, integrating SAP and non-SAP applications

SAP Datasphere | AWS | SAC

Healthcare

Developed a modern analytics platform using SAP Datasphere and Azure. Redesigned BW/4HANA artifacts via greenfield approach, improving performance and flexibility.

SAP Datasphere | Azure

Energy

Modernized legacy SAP BW by building a business data fabric on SAP Datasphere, enabling a unified financial view, improving cash forecasting accuracy, and empowering agile, data-driven decision-making

SAP Datasphere | SAC Planning
Azure Databricks

Fast Track Your Transformation With Our Pre-built Accelerators

We help enterprises transform legacy BW systems into modern, intelligent, AI-ready data platforms powered by **SAP Business Data Cloud**
